

Cash Management & ATM Security Solutions

Protecting Currency. Securing Transactions. Controlling Access.

The RA-Lock Group delivers high-security locking and access control solutions engineered specifically for cash-handling equipment and ATM machine manufacturers. Our systems protect cash cassettes, service doors, vault compartments, and internal electronics while enabling strict access accountability across manufacturing, distribution, and field service environments.

- Hardware Installation & Maintenance

ATM & CASH EQUIPMENT SECURITY SOLUTIONS

ATM Cam Locks & Vault Locks

- High-security cam and vault locking systems engineered for ATM doors, cassette compartments, and internal service panels.

Key Control & Restricted Key Systems

- Patented, restricted key programs that prevent unauthorized duplication and maintain strict accountability across service networks.

Electronic & Offline Access Control

- Offline access solutions that log activity and support audit trails for field technicians and service teams.

Key Management & Smart Key Cabinets

- Centralized key storage and issuance systems for service depots and armored carrier operations.

OEM Lock Programs & Custom Solutions

- Custom lock design, master key system development, and documentation management for ATM manufacturers and equipment OEMs.
