

High-Security Access Solutions - Casinos & Gaming

Modern casinos operate high-risk, high-value environments that demand strict access control, auditability, and compliance. Cash handling areas, surveillance rooms, count rooms, vaults, server rooms, cage offices, gaming floors, and restricted back-of-house spaces require layered security systems that prevent unauthorized access, support regulatory audits, and protect revenue, guests, and staff.

The RA-LOCK Group delivers mechanical and electronic security solutions designed to protect critical gaming infrastructure while simplifying access control across 24/7 casino operations. Our systems secure cage and count rooms, vaults, surveillance and IT spaces, gaming machines, slot storage, hospitality back-of-house areas, and administrative offices while enabling full audit trails, key accountability, and scalable access management across entire properties.

SYSTEM INTEGRATION - LAYERED PROTECTION

- Perimeter: Padlocks & All-Weather Locks
- Cages & Vault Areas: High-Security Cylinders
- Control: Key Cabinets & CLIQ Software
- Entry: Mortise/LFIC Cylinders
- Restricted Doors: Master Key
- Other Critical Casino Spaces
