

# High-Security Locking Solutions for Data Centers

Modern data centers manage critical infrastructure, sensitive data, tenant environments, and high-value equipment, creating complex access-control challenges across secure facilities. The RA-Lock Group delivers high-security mechanical and electronic locking solutions that protect physical infrastructure, reduce operational risk, prevent unauthorized access, and provide centralized control over every door, cabinet, rack, and enclosure. Our systems support compliance-driven environments, secure tenant separation, manage large key systems, protect critical assets from gate to rack, and help data center operators maintain uptime, audit readiness, and regulatory compliance.

## SYSTEM INTEGRATION - LAYERED PROTECTION

# WHY DATA CENTER OPERATORS TRUST THE RA-LOCK GROUP

- Proven high-security solutions for mission-critical environments
- Strong key control with restricted and patented keyways
- Full audit trails and access history for compliance
- Zero-rekeying, access revocation is digital
- Scalable systems supporting multi-site and colocation facilities

## RA-LOCK SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

## CORE SOLUTIONS FOR HIGHER EDUCATION

### ELECTRONIC ACCESS CONTROL

Ideal for data halls, mantraps, control rooms, and secure tenant areas.

- Medeco XT – electronic cylinders with full audit trails
- ABLOY PROTEC<sup>2</sup> CLIQ™ – hybrid mechanical/electronic control
- eCLIQ Server Locks – programmable access for cages and enclosures

Benefits: Reduce rekeying, control access by schedule, and track activity in real time.

### KEY & ASSET MANAGEMENT

Perfect for operations, facilities, security, and compliance teams.

- Security Asset Manager™ (SAM) electronic key cabinets
- Smart FOB SAM – badge and card management
- CLIQ Software – centralized reporting and oversight

Benefits: Prevent key loss, track every user, and secure valuable equipment.

### HIGH-SECURITY LOCKING SYSTEMS

Designed to protect physical infrastructure and prevent unauthorized duplication.

- Medeco M4 Restricted Keys
- KeyMark x4 Key Systems
- ABLOY PROTEC<sup>2</sup> Disc Lock Technology

Benefits: Protect tenant environments and ensure physical security integrity.

### PADLOCKS & EQUIPMENT SECURITY

- Bluetooth padlocks
- Weatherproof & shrouded locks
- High-security asset protection
