

High-Security Access Solutions for Fuel Stations

Fuel stations operate in high-traffic, high-risk environments that demand durable, tamper-resistant, and weather-ready access control. Dispensers, underground tank access, payment compartments, electrical panels, service doors, storage cages, and POS back-of-house areas require layered security systems that prevent theft, skimming, vandalism, and unauthorized access while maintaining uptime and compliance. The RA-LOCK Group delivers industrial-grade mechanical and electronic security solutions designed specifically for fuel dispensers and forecourt infrastructure. Our systems secure pump electronics, EMV card reader compartments, dispenser doors, underground tank ports, POS rooms, electrical panels, storage cages, and service areas while supporting audit trails, technician accountability, and scalable access control across multi-site fuel networks.

SYSTEM INTEGRATION - LAYERED PROTECTION

Dispenser Doors: High-Security Cam Locks

Electrical Panels & UST Ports: Tamper-Resistant Locks

Control: Key Cabinets & CLIQ Software

Entry: Cam Locks / Mortise / Cylinders

Perimeter: Padlocks & All-Weather Locks

Other Critical Spaces

Building/ Office Doors

Storage Cages

Service Bays

WHY FUEL STATIONS TRUST RA-LOCK GROUP

- Proven protection for dispensers and forecourt infrastructure
- High-security locks designed for outdoor exposure & vandal resistance
- Restricted keyways to prevent unauthorized duplication
- Supports compliance and EMV/PCI security programs
- Scalable systems for single locations or multi-site fuel chains

RA-LOCK SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

CORE SOLUTIONS FOR GAS PUMPS & FUEL DISPENSERS

ELECTRONIC ACCESS CONTROL

Ideal for POS rooms, electrical panels, service doors, and restricted staff areas.

- Medeco XT – electronic cylinders with audit trails
- ABLOY PROTEC² CLIQ™ – hybrid mechanical/electronic access control
- Yale nexTouch™ – keypad + keycard electronic door locks
- Master Lock Vault Enterprise – mobile-access Bluetooth padlocks

HIGH-SECURITY LOCKING SYSTEMS

- Medeco M4 Restricted Keys – Duplication-protected dispenser keys
- KeyMark x4 – Flexible cam & door lock retrofits
- ABLOY PROTEC² Disc Lock Technology – Extreme outdoor durability

KEY & ASSET MANAGEMENT

Perfect for maintenance teams, fuel technicians, IT, and security.

- Security Asset Manager™ (SAM) – Electronic key cabinets with audit logs
- Smart FOB SAM – Compact key & badge management
- GFMS™ Cloud Software – Enterprise-level monitoring & reporting

PADLOCKS & EQUIPMENT SECURITY

- ABLOY Super Weatherproof Padlocks – Tank ports, cages, service yards
- Hockey Puck Locks – Roll-up doors, cage access
- Bluetooth Padlocks – Mobile technician access & audit trails
