

Locker Security & Access Control Solutions

Protecting Personal Property. Controlling Access. Simplifying Management.

Locker environments require secure, reliable access control that balances user convenience with administrative oversight. From high-traffic public facilities to controlled employee and student areas, The RA-Lock Group delivers mechanical and electronic locker security solutions engineered to prevent theft, eliminate unauthorized access, and simplify credential and key management across single-site and multi-location operations.

INDUSTRIES

- Gyms, Fitness Centers & Health Clubs
- Schools, Universities & Athletic Facilities
- Workplace & Employee Locker Rooms
- Transportation Hubs & Public Venues
- Government, Military & Secure Facilities

WHY FACILITY MANAGERS TRUST THE RA-LOCK GROUP

- Durable, tamper-resistant locker locks built for high daily use
- Flexible access options: key, combination, card, PIN, or mobile
- Centralized control for large locker banks and multi-site facilities
- Reduced administrative burden and lost-key costs
- Scalable solutions for new builds and retrofits

RA-LOCK
SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

CORE SOLUTIONS FOR LOCKER SECURITY OPERATIONS

Mechanical Locker Locks

- High-quality cam and latch locks designed for metal, wood, and laminate lockers with resistance to picking, prying, and forced entry.

Electronic & Smart Locker Locks

- Keypad, RFID, and mobile-enabled locks that support shared-use or assigned lockers with programmable access schedules.

Restricted & Patented Key Control

- Prevents unauthorized key duplication and ensures accountability for maintenance staff, supervisors, and administrators.

Key & Credential Management

- Centralized systems for issuing, tracking, and auditing keys, cards, and credentials across facilities.

OEM & Retrofit Locker Programs

- Direct-fit replacement locks, retrofit solutions, and custom programs for locker manufacturers and facility upgrades.
