

OEM Tank Manufacturing Security Solutions

Protecting Assets. Securing Access. Standardizing Production.

The RA-Lock Group delivers engineered locking and access control systems designed specifically for OEM tank manufacturers producing fuel, chemical, water, and industrial storage tanks. Our solutions secure service hatches, fill ports, valves, control panels, and internal components while supporting standardized manufacturing programs, compliance documentation, and scalable production requirements.

INDUSTRIES

- Fuel Tank Manufacturers
- Chemical Storage Tank Manufacturers
- Water & Wastewater Tank Manufacturers
- Agricultural Tank Manufacturers
- Industrial Process Tank Manufacturers
- Transport & Mobile Tank Builders
- Utility Infrastructure OEMs
- Specialty Containment Manufacturers

WHY OEM TANK MANUFACTURERS CHOOSE RA-LOCK GROUP

- Heavy-duty, corrosion-resistant locking systems
- Anti-tamper, anti-pick, and anti-drill security designs
- OEM manufacturing & private-label programs
- Standardized lock specifications across product lines
- Compliance documentation & audit support
- Scalable programs for high-volume production

RA-LOCK SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

CORE FABRICATION SECURITY SOLUTIONS

Hatch, Fill Port & Manway Security

- Secures access points on storage tanks, transport tanks, and containment vessels to prevent unauthorized access and contamination.

Valve & Control Panel Protection

- Protects valve controls, electrical panels, and monitoring systems from tampering and unauthorized operation.

Corrosion-Resistant & Outdoor-Rated Locking

- Locks engineered for extreme weather, chemical exposure, and harsh industrial environments.

Restricted & Patented Key Control

- Prevents unauthorized key duplication while supporting service networks and compliance teams.

OEM Integration & Standardization Programs

- Custom engineered lock programs, documentation, master keying, and standardized production integration.
