

Payment Kiosk Manufacturer Security Solutions

Protecting Transactions. Securing Revenue. Controlling Access.

The RA-Lock Group delivers high-security locking, key control, and access management systems engineered specifically for payment kiosk manufacturers. Our solutions protect cash compartments, card readers, service doors, internal electronics, and data-sensitive components while maintaining strict access accountability across manufacturing, distribution, and field service environments.

INDUSTRIES

- Centralized key and access control
- Nationwide installation & service
- Full OEM documentation management
- Compliance and audit readiness

RA-LOCK
SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

KIOSK SECURITY SOLUTIONS

High-Security Cam & Service Door Locks

- Engineered locking systems for kiosk doors, cash cassettes, and internal service panels with resistance to drilling, picking, and forced entry.

Restricted & Patented Key Control Systems

- Prevents unauthorized duplication and maintains strict accountability across technician and service networks.

Offline & Networked Access Control

- Electronic and offline access solutions that log access activity and support audit trails for maintenance teams.

Key Management & Smart Cabinets

- Centralized issuance and tracking of technician keys for depots and service providers.

OEM Lock Programs & Custom Integration

- Custom lock design, master key systems, documentation, and long-term OEM program management.
