RA-LOCK
GROUP

Rail Security & Access Control Solutions

Protecting Rolling Stock. Securing Infrastructure. Enabling Safe Operations.

Rail systems depend on secure access across rolling stock, trackside equipment, and critical infrastructure while supporting frequent maintenance and field service activity. The RA-LOCK Group delivers high-security locking, key control, and access management solutions engineered to protect railcars, locomotives, signal cabinets, control panels, and maintenance facilities while ensuring accountability, uptime, and operational safety across rail networks.

INDUSTRIES

- Freight & Passenger Rail Operators
- Transit Authorities & Light Rail Systems
- Railcar & Locomotive Manufacturers
- Rail Maintenance & MRO Providers
- Government & Transportation Agencies

THE
RA-LOCK
GROUP

WHY RAIL OPERATORS TRUST THE RA-LOCK GROUP

- Heavy-duty, weather-resistant locking solutions for harsh environments
- Tamper- and vandal-resistant designs for unattended infrastructure
- Restricted and patented key control across field technicians and contractors
- Scalable access systems for multi-yard and multi-region operations
- Supports safety audits and regulatory compliance

RA-LOCK
SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

CORE SOLUTIONS FOR RAIL SECURITY

Rolling Stock & Equipment Locks

- High-security locks for railcars, locomotives, tool cabinets, and onboard compartments with resistance to picking, drilling, and forced entry.

Trackside & Signal Cabinet Security

- Locks engineered for signal houses, relay cabinets, control boxes, and wayside equipment exposed to weather and vandalism.

Restricted & Patented Key Control

- Prevents unauthorized key duplication and ensures accountability for operators, maintenance crews, and third-party contractors.

Electronic & Hybrid Access Control

- Electronic cylinders and hybrid systems that enable programmable access, audit trails, and credential-based control for critical rail assets.

Key & Asset Management Systems

- Centralized tracking and management of keys and credentials across rail yards, depots, stations, and maintenance facilities.
