

Vending Machine & Micro-Market Security Solutions

Protecting Inventory. Securing Revenue. Controlling Access.

The RA-Lock Group delivers high-security locking, key control, and access management systems engineered specifically for vending machines, micro-markets, and unattended retail environments. Our solutions protect cash boxes, product compartments, refrigeration units, and internal electronics while enforcing strict access accountability across manufacturing, distribution, and route service operations.

INDUSTRIES

- Vending Machine Manufacturers
- Micro-Market & Smart Fridge OEMs
- Route Operators & Service Providers
- Office Refreshment & Foodservice
- Hospitality & Travel Centers
- Education & Healthcare Facilities

WHY VENDING OPERATORS CHOOSE RA-LOCK GROUP

- Anti-tamper and forced-entry resistant designs
- Centralized key accountability
- Nationwide installation & service
- Full OEM documentation management
- Scalable route-based access control

RA-LOCK SERVICES

- Master Key System Management
- Site Survey & Documentation
- Hardware Installation & Maintenance

VENDING SECURITY SOLUTIONS

High-Security Vending Locks & Cam Locks

- Engineered locking systems for machine doors, cash compartments, service panels, and refrigeration units with resistance to drilling, picking, and forced entry.

Restricted & Patented Key Control

- Prevents unauthorized duplication and maintains accountability across route drivers, technicians, and warehouse staff.

Offline & Networked Access Control

- Electronic and offline access systems that log access activity and support audit trails for route accountability.

Key Management & Smart Cabinets

- Centralized key issuance and tracking for route depots and service hubs.

OEM Lock Programs & Custom Integration

- Custom lock design, master key systems, documentation, and long-term OEM program management.
